

Hi Brennan! Thank you, thank you, thank you for your voice of reason and conscience. My family has owned our home @ 230 Koser since 1949. My dad, Gene Taylor, was the treasurer of UHeights for eons, not sure how long. Many years.

Although I live in Seattle, I have kept and maintained 230, "just in case" I decide to return to my IC home. I have followed this closely, written to the council about this matter, and I sure hope that the wonderful and very talented people of U.Heights can succeed in their attempts to alter the present trajectory of planning by Maxwell et al. You are a very brave person, and I know it has been time consuming, to continue to speak out on this matter.

Silence is acceptance!

I have been back twice this year, for the beautiful spring, then my annual trip to eat as many tomatoes, and as much corn, as possible during my August trip.

I hope your segment is on the broadcast tonight. I will try to pick it tonight on podcast.

FYI they interviewed me too!
Hope it helps

Subject: "Save the ravine" on KCRG TONIGHT, 5 pm

They interviewed me just now, in front of the ravine! It will air tonight at 5 pm on KCRG.

If you haven't seen the "Save the ravine" pdf yet you can download it here:

<https://sites.google.com/site/alicehaugen/rational-development-for-university-heights>

(bottom of the page)

If anyone would like to record the segment that would be great. KCRG may have a link to it later but I don't know if we can depend on that.

Peace +

Alice

Ring the bells that still can ring
Forget your perfect offering
There is a crack in everything
That's how the light gets in.
