

## University Heights April 2015 eGovernment Report

### 4<sup>th</sup> Room Theatre Sound Permit Request

4<sup>th</sup> Room Theatre's 3<sup>rd</sup> Annual Free Summer Classics for 2015 will be Shakespeare's *The Tempest* the weekends of August 13-16 & 20-23. The production will be held on Dr. Flaum's yard as it has been the previous two years. 4<sup>th</sup> Room Theatre requests council permission to use a sound amplification system as it also has previously.

### MetroNet Update

Metronet does not yet have an exact date that they plan on surveying University Heights, but will advise a week to 10 days in advance as they did in Iowa City. This sample language below will be posted on the city website and a press release will be sent to local media. In addition, I have also included at the end of this report, sample door hangers that will be used while the Metronet team is on the ground as well as a one page information sheet on Metronet.

Metronet survey crews to visit University Heights beginning **DATE INSERTED**

Issued by: eGovernment Committee

Beginning **DATE INSERTED**, survey crews from Metronet Technologies, a fiber optic networking company offering high-speed Internet, phone, and TV services, will be conducting field engineering and surveying work in University Heights neighborhoods.

Metronet crews will be placing door hangers at residences in the areas where they plan to conduct their work. Surveying may require Metronet employees to enter back or side yards in order to access the utility easements or pole lines. Employees will carry proper identification and vehicles will display a Metronet sign.

Metronet is headquartered in Evansville, Indiana and has established fiber communications systems in 19 Indiana communities since 2005. The company is seeking to expand in the Midwest. More information on the company can be found at <http://www.metronetinc.com/about>. For questions regarding Metronet, call [812-213-1313](tel:812-213-1313).

## SURVEYING NOTICE

Metronet Technologies will be in your neighborhood performing surveying work for the construction of a state of the art fiber network to provide Gigabit Internet, TV and phone services.

As part of this process, we may need to access the utility easement adjacent to your property. We will make efforts not to disturb you or your property as we perform this important work.

Thank you for your understanding.

## About Metronet

“Building Gigabit Communities”

Headquartered in Evansville, Indiana, Metronet is a customer-focused company that provides cutting-edge fiber optic communication services, including high-speed Fiber Internet, full-featured Fiber Phone, and Fiber IPTV with a wide variety of programming.

Metronet got its start in 2005, with their first fiber optic network in Greencastle, Indiana, and has since grown to offer 100% fiber in 19 communities statewide. Currently, Metronet’s network has the capacity to service more than 115,000 homes and businesses with a 40,000+ customer base. Due to the company’s current success, Metronet is looking to expand within a 5 state radius in the Midwest to qualifying communities.

All Metronet services are delivered across their 100% fiber optic network— using glass fibers rather than conventional copper cable lines. A 100% fiber optic network offers a much greater bandwidth (up to 100 times faster than basic broadband) than any other technology available, allowing more data to be transmitted faster. Metronet’s communities are among the first handful of cities in the U.S. to receive this state-of-the-art technology.

Every business within Metronet’s service area is directly connected to their network allowing Internet speeds up to 1 Gig or more. The direct connection means consistently fast Internet, with no slowdowns because businesses aren’t sharing their connection with others. More data flowing through the network means more data is being sent to your TV as well. So, your picture becomes clearer than ever whether you’re watching in HD or standard definition—with no pausing, stuttering, lag time or pixilation. The benefits of bandwidth also apply to phone technology, allowing delivery of clear, reliable call quality.

Metronet’s commitment to their communities doesn’t stop at bringing exciting new technology to homes and businesses. They’re also proud to have local retail stores, staffed with friendly associates and technicians who actually live in the communities they serve. Their innovative store design allows customers to test drive Metronet products at interactive kiosks, sign up for services, pay their bills, and much more.

How can your community become a “Gigabit Community” powered by Metronet? Additional Information is available! Please contact:
