

UHPD Community Education Night
Wednesday, February 6, 2019
6:30pm at the Community Center

from Chief Nate Petersen:

Because this is the first of its kind, my plan is to have this be a general topic night. We will give a general overview of the equipment we have, and I'll touch on some of the new things we have coming. We'll answer questions along the way about whatever we're discussing at the time. At the end I will be available for questions from community members on anything. The purpose of the community education night is to educate residents on police equipment and/or practices. In addition, I will share information about some calls that UHPD officers have responded to recently. Most cases will still be on-going, so exact details will not be given. In addition, no confidential information from our calls for service will ever be shared. I see this as an opportunity to let residents know what their police department is doing and what we are responding to.
